For Immediate Release

## Air Compressor Recycling Program...

By scrapping and recycling your old Air Compressor products and materials that would otherwise take up valuable space or burden our landfills, **ENERQUIP** helps minimize the environment impact, limits your excess unwanted plant & ensure proper disposal of regulated wastes.

The **ENERQUIP** Scrappage Scheme is now well under way and proving popular. New Air Compressor customers with a qualifying old Air Compressor are benefiting from the additional support made available through this initiative. The **ENERQUIP** Scrappage Scheme currently offers qualifying customers the following (please note that the **ENERQUIP** Scrappage Scheme allowances detailed below include from \$500-\$1,000 Scrappage Subsidy funded by the Factory Subsidies)

### •Screw Air Compressors

New Screw Air Compressor customers with a qualifying old Screw Air Compressors are eligible for a minimum of \$1,000 Scrappage allowance across most of the range. Peter Humble said “**In many cases we're offering even more; Up to \$2,500 on new CSD 100 Models (Packaged Units including Receiver and Dryer) Up to \$3,200 on**

**new DRE Models (Packaged Units including Receiver and Dryer) Up to \$4,400 on the new Anest Iwata Oil Free Air Compressor Model SLP-150EB.”**

Across many models the Scrappage allowance is offered in addition to low rate finance schemes & the **ENERQUIP Rent Try Buy Program**.

### •Reciprocating Air Compressors

New Screw Air Compressor customers can qualify with an old Reciprocating Air Compressors and may be eligible for a minimum of \$500 Scrappage allowance across all new Screw Air Compressor models. Mr Humble said “**In some cases we can offer as an example \$1,100 on CSA Rotordry Packages, up to \$4,500 on Variable Speed Air Compressors over 45kw (60Hp)”**
